

1 Vehicle Inspection Details

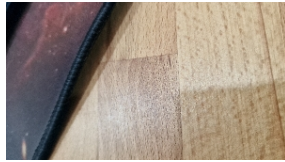

Client	1234 regno	Installation	573828
Vehicle Registration Number:		Odometer Reading:	

Driver Vehicle Check

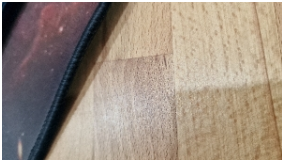

Lamps / indicators / side repeaters / stop lamps	<input checked="" type="checkbox"/>
Reflectors / markers / warning devices	<input checked="" type="checkbox"/>
Mirror / windscreen / glass condition	<input type="checkbox"/>
Body / wings	<input type="checkbox"/>
Oil / coolant / fluid levels	<input checked="" type="checkbox"/>
Seat belts	<input checked="" type="checkbox"/>
Load security	<input checked="" type="checkbox"/>
Horn / wipers / washers	<input type="checkbox"/>
Doors	<input type="checkbox"/>
Brakes	<input type="checkbox"/>
Instrument panel (warning lights etc)	<input type="checkbox"/>
Exhaust condition	<input type="checkbox"/>
Driving controls / steering operation	<input type="checkbox"/>
Tyre condition / wear	<input type="checkbox"/>
Speedometer operation	<input type="checkbox"/>
Wheels condition	<input type="checkbox"/>
Battery condition	<input type="checkbox"/>

Vehicle Defects

This is my defect description.

10:21 75%

https://portal.wiggettelectrical

Maximum Disconnecting Time Permitted by Regulation 120.9, 122.7.3 and 122.9.6 Certificate.

Maximum Disconnecting Time Permitted: 3

System Type and Earthing Arrangement

Live: 2.5 MM² CPC: 5.2 MM²

4. Test Results for The Circuit Altered or Extended

System Type and Earthing Arrangement

U.I.B. Location and Type	Type	Rating
11	12	13 A
12	15 A	16 A

Disconnector sizes	13 A	16 A
17	18	21
19	20	21
22	23	28

Maximum measured earth fault loop impedance, Z_s: 25

Disconnection time: 27 ms Satisfactory test within specification: 28

30 Continuity: 31

33 RCD: 34

Regulation 120.9, 122.7.3 and 122.9.6 Certificate.

Maximum Disconnecting Time Permitted by Regulation 120.9, 122.7.3 and 122.9.6 Certificate.

Maximum Disconnecting Time Permitted: 3

System Type and Earthing Arrangement

Live: 2.5 MM² CPC: 5.2 MM²
